

2" iClad™ Snow Retention System

For Standing Seam Metal Roof Systems

- ❖ Aircraft-Grade Aluminum Extrusion
- ❖ Utilizes Patent-Pending WaveLock™ Technology
- ❖ Attach to Virtually Any Standing Seam Profile
- ❖ Unparalleled Strength & Easy-to-Install
- ❖ No Painting Required
- ❖ Non-Penetrating Seam Attachment
- ❖ iPlate™ for Sliding Snow & Ice
- ❖ Made in the USA

Typical 2" iClad™ Assembly

Overview

Sno Gem's® 2" iClad™ is an innovative clamp to the seam bar/fence snow retention system that utilizes the Sno Cube™ Clamp. The Sno Cube™ can attach to virtually any standing seam profile and provides unparalleled strength using Sno Gem's® WaveLock™ Technology with 3 points of attachment. Offering easy installation, Sno Cube's™ Silver Bullet™ set screws include a rounded bullet tip to maximize strength that won't damage the paint finish or pierce the seam. Additionally, the iClad™ system comes in standard mill finish aluminum material, making it an item you can easily keep in stock when the need arises. Once installed, it only takes seconds to attach the pre-finished metal trim from the material that was used to install the panels (not included) onto the face of the iBeam™ to have an aesthetically pleasing and effective snow retention system that matches your standing seam roof system.

For additional details, engineered layouts (if desired), technical questions, or to get an estimate, visit snogem.com or call 888-SNO-GEMS.
